The Hellenic Scholarships Foundation is a non-profit organization whose purpose is to award students of Hellenic origin attending institutions of higher learning in the province of Quebec (Canada) who excel in their studies.

For over 30 years, the Hellenic Scholarships Foundation takes pride in awarding scholarships and distinctions to the students. Their academic performance constitutes an honour for the Hellenic community and is a source of hope for the future.

*“Words are not enough to express my gratitude to the Hellenic Scholarships Foundation (HSF) for having been selected as a recipient of this scholarship. This scholarship contributed to covering my expenses and tuition fees as an international graduate student in McGill; thus relieving me from a great amount of stress during my studies. But most importantly, it made me part of a huge and valuable network and made me feel that, despite being so many kilometres away from home, I am part of another family, that of the HSF”.*

*“I had the honor to be one of the recipients of the HSF Scholarship of the 2018-2019 academic year. In an event that took place in a beautiful venue, the HSF awarded the scholarships to students of Hellenic origin. The support that is given to students is extremely important towards the continuation of their studies, especially since this support comes from members of the Hellenic community. I am really happy and honored that I was selected as one of the recipients of the scholarship”.*

2018-2019 Recipient of the Hellenic Congress of Quebec Scholarship

Concordia University

*“The Hellenic Scholarship Federation and its support of graduate students in the greater Montreal area is truly exemplary on all fronts. I am immensely proud to both represent our cultural legacy of contributing new knowledge/ ideas through academic channels and that such an organization like the HSF exists to celebrate the contributions of Hellenes in this regard. As a previous recipient of the Pink in the City Scholarship, little did I know that in addition to the support I received to conduct and disseminate my doctoral research, I would also gain lifelong friendships with the Vourtzoumis family. I was a transplant from the San Francisco Bay Area to pursue graduate studies in Montreal, and members of the HSF were among the first community connections I made. The financial support of the Pink in the City scholarship enabled be to publish my thesis work in the area of pediatric cancer, and present this work at an international clinical conference. These activities are the cornerstones for junior scholars who aspire to pursue academic career paths following graduate school, and for which Pink in the City in partnership with the HSF will continue to facilitate for many more students like me. Through this organization, I have also expanded my network of faculty mentors, students and other members of the community who share my commitment to promoting Hellenism in spheres of higher education in North America and beyond”.*
